MARK FRIZAS

FULL-STACK DEVELOPER

Iloilo, Philippines | markfrizas1@gmail.com | markfrizas.vercel.app
github.com/mark-12-fr | linkedin.com/in/mark-frizas-5034a6346

PROFESSIONAL SUMMARY

Full-stack developer and 3rd-year BSIT student who builds and deploys web applications end to end using Next.js (React, TypeScript), FastAPI, and PostgreSQL. Team lead of AcadTrack, an academic management system for teachers and facilitators presented at the 2nd INNOVEX 2026 International Conference in Indonesia. Experienced in database design, secure REST APIs with JWT authentication, mobile-first PWAs, and deployment on Vercel and Railway. Works well in a team and picks up new tools quickly.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), TypeScript, SQL
Frontend	React, Next.js, HTML5, CSS3, EJS, Chart.js, Progressive Web Apps (Service Workers, Web Push)
Backend	FastAPI, Flask, SQLAlchemy (async), REST APIs, JWT authentication, Groq & Gemini AI APIs
Databases	PostgreSQL, Supabase, relational database design
Tools & Cloud	Git, GitHub, Vercel, Railway, Render, CI/CD
Familiar With	Node.js, PHP, Java, MySQL, WordPress, Figma

PROJECTS

AcadTrack — Teacher Management Portal *2026*

Team Lead, 3-person team · **acadtrack.asia** · Next.js, React, TypeScript, FastAPI, PostgreSQL

- Led a three-developer team building an academic management system for teachers: sections, attendance, class records, configurable grading, and analytics.
- Designed a Next.js frontend and an async FastAPI + SQLAlchemy API on Supabase PostgreSQL, with JWT-verified, role-scoped access for teachers and facilitators.
- Built an AI assistant and photo-to-score grading (Groq with Gemini fallback) and Excel exports in DepEd class-record format.
- Presented at the 2nd INNOVEX 2026 International Conference in Indonesia.

AcadTrack — Facilitator Dashboard *2026*

faci-panel.vercel.app · Next.js, React, TypeScript, FastAPI, PWA

- Mobile-first, installable PWA for facilitators: attendance, activity records, and section performance, with Web Push notifications.
- Uses the same PostgreSQL database and grade weights as the teacher portal, so grades always match.
- Ported from vanilla JavaScript + Supabase to Next.js and a FastAPI backend with JWT auth and server-side data scoping.

Shopper — E-Commerce PWA *2026*

shopper-self-omega.vercel.app · JavaScript, Flask, PostgreSQL, PWA

- E-commerce PWA with product browsing, voice and barcode search, cart, wishlist, order history, support chat, and offline mode.

EXPERIENCE

Independent Full-Stack Developer *2026 — Present*

- Design, build, and deploy full-stack web apps end to end: database, REST API, UI, and hosting.
- Lead the 3-person MJR Vertext team on AcadTrack from planning through deployment and releases.

EDUCATION

Bachelor of Science in Information Technology *3rd Year — Ongoing*

PHINMA University of Iloilo
